

TideRx

Turning the tide on the opioid epidemic where it begins -- the prescription

Product Features

- Mobile app solution to print, track, cancel, and authenticate a written Rx
- Zero software learning curve
- Frictionless adoption by doctors and pharmacists
- Does not collect patient PII or PHI
- Uniquely signs and watermarks each Rx, One-Time RX™ technology
- Mobile app security vetted using industry-leading cybersecurity forensic tools
- Single source for prescription creation and authentication

Our Commitment

As a leading technology company, APIS Point has committed itself to the U.S. Surgeon General's TurnTheTideRx pledge initiative.

We developed TideRx and our One-Time RX™ technology to enable our customers to turn the tide on the opioid epidemic by innovating the prescription process from prescriber to pharmacist.

TideRx Promotions

- TideRx is free
- Prescribers receive 20 complimentary RXs
- Pharmacists verify RXs for free

Who is it for

- Doctors
- Pharmacists
- Policy Makers

How it Works

End-to-End Prescription Lifecycle Using the TideRx App

- 1 Prescriber requests a Rx
- 2 TideRx digitally signs and returns a blank Rx
- 3 Rx is printed, filled in, and given to the Patient
- 4 Pharmacist verifies Rx authenticity and fulfills

Where to Get It

Apple App Store, iOS: iPhone, iPad, and iPod Touch

Google Android **coming soon**
